

**NEW-York Computer Support is a full service IT support and Managed Service Provider. NEW-York Computer Support provides out-sourcing services to businesses in the New York area.**

specialize in design, implementation, support and maintenance on every aspect of data systems from data center design, through firewall / VPN security to end-user support.

NEW-York Computer Support tailors its support offerings to fit your requirements. We offer On-Demand Support, Project Based Work, Strategic Planning, 24x7 System Monitors and Managed Services. We secure computer networks, eliminate recurring problems, perform on-going administration, and integrate new technology. Our staff delivers personalized service, resolves problems effectively, and we respect your time. Additionally we can provide systems design and architecture services, backup systems, disaster recovery and business continuity planning and implementation, manage rollouts of new equipment or applications, network security system design and implementation, systems assessments and vulnerability and penetration testing.

**NEW-York Computer Support provides value through a proactive approach.**

Planning, preparation and prevention are smarter, less costly and less stressful than alternative support methods. Our products increase security, reliability and save our clients time and money.
